English to German Words

German is relatively easy to pronounce, because it is basically pronounced as it is written. Perhaps the major difficulty for English speaking people is the umlaut sound discussed below.

HINTS FOR BETTER GERMAN PRONUNCIATION

1. The three "umlaut vowels" look like this: ä, ö and ü. They are pronounced differently than regular vowels a, o, and u.

Examples: schön, zwölf, spät, Käse, März, Glück, fünf

2. The German sound written as "ch" is a bit difficult to pronounce, and there is no exact equivalent in English.

Examples: ich, nicht, Milch, sprechen, reich

You may substitute this sound with "sh," which would be understandable throughout Germany. Our phonetic approximations teach the "sh" sound, as in "ish."

3. After the vowels a, o, and u, "ch" has a guttural "k" sound.
Examples: Nacht, machen, Buch, auch, hoch, noch, nach, Kuchen
4. The letter "v" is pronounced as "f." Examples: Vater, viel, Vogel, von
5. The letter "w" is pronounced as "v."
Examples: wo, wie, was, wer, Wolf, wann
6. A final "d" in a word is pronounced as "t."
Examples: Hund, Hand, Wand, Sand, und
7. A final "g" in a word is pronounced as "k." Examples: Tag, Weg, klug
8. An initial "s" in a word or a syllable is pronounced as "z." Examples: sagen, sieben, lesen
9. An initial "z" sounds like "ts." Examples: zehn, Zeit, zeigen
10. Although the German alphabet is like that of English, there is a special consonant called an "ess-tset." It looks like this "ß." Examples: Fußball, grüßen, süß

PHONETIC APPROXIMATIONS

Remember: The phonetic approximations only approximate the sounds of German. Use them to assist you with the pronunciation when necessary. When you read the approximations in English you will be understood in German, although you may sound somewhat "foreign." Also, notice that in the phonetic approximations, syllables written in the upper case should be stressed. Example: HILL-fuh. Hyphens separate syllables and slash marks separate words.
